

Hande Sekerciler was born in 1982 in Bursa, Turkey. She attended Marmara University Department of Arts and Crafts Teacher Education from 1998 to 2002. Hande is a sculptor known for her figurative sculptures. Her sculptures have been influenced by realistic works of renaissance and Hellenistic periods. By time, Hande's sculptures have evolved and include many more details. Her interest in technology and new production techniques helps her to mix classical forms and contemporary production methods. She uses state-of-the-art software and hardware during her productions.

Hande is also running a side project, an artist duo called [ha:ar](#), where they are searching ways of knocking together digital and traditional arts.

She currently works and lives between Istanbul and New York.
